NEW WING RELEASE

Introducing the M1-L

Suited to

The M1-L is designed for those seeking high performance on a budget. It offers excellent value without sacrificing performance, making it ideal for newcomers to wing foiling as well as more experienced riders. This model will support your progression from beginner to expert.

A performance wing at a friendly price point

Our signature performance Dyneema material, used through the center of the leading edge (loading point), ensures rigidity is maintained, while the rest of the frame is constructed with Dacron to significantly reduce manufacturing costs.

This approach allows us to offer a high-performing wing at a lower retail price.

If you're looking for the best value without compromising on performance, the M1-L is for you. This model is also ideal for those new to wing foiling. The overall feel of this wing is slightly softer than the M1-X model, while still retaining the crisp, snappy, and super-tight canopy that PPC's wings are renowned for.

The M1-L is also equipped with our exclusive full carbon ergo-boom handles.

Specifications

Sizes	Weight
3m	2.27kg / 5.00lbs
4m	2.55kg / 5.62lbs
5m	2.83kg / 6.24lbs
6m	3.36kg / 7.41lbs

Introducing the M1-X

Suited to

This high-end, lightweight wing features a stiff frame, ideal for those seeking optimal performance in wave freestyle use.

Light as air, strong as steel

If you loved the M1 but found it a bit heavy or grunty, you'll LOVE the M1-X.

Designed with the same dynamic and efficient characteristics as the M1, the M1-X features a lighter canopy material, which reduces the overall weight of the wing and adds an element of forgiveness, while still retaining our signature stiff Dyneema frame.

The significant weight reduction allows the M1-X to flag out and park exactly where you want it while surfing the waves.

The reduced canopy weight, combined with our ultra-rigid frame and new full-carbon ergo boom handles, makes the M1-X a true standout in our range for those seeking pure performance.

Specifications

Sizes	Weight
3m	2.20 kg / 4.85 lbs
4m	2.50 kg / 5.51 lbs
5m	2.78 kg / 6.12 lbs

The M1

Suited to

Perfect for experienced and advanced riders who seek high performance and precision in their maneuvers. It's designed for those who demand responsiveness, speed, and power.

No other wing feels like the M1 Wing

From the moment you start, the M1's responsive pump and immediate power are unmistakable. You're up and foiling almost before you realize, cutting through the water with precision and ease. The custom PPC single-piece molded, full carbon ergo-boom handles contribute to this experience with a 50% reduction in weight, offering zero lateral movement for full control.

When a gust strikes, the M1's aerofoil holds its shape flawlessly, translating wind into speed efficiently. The upwind performance is striking—achieving new heights and control at speeds that redefine your

foiling experience. The sail remains stable without any flutter, maintaining balance as you sheet in on the next tack with undiminished speed. Gybing maintains the same level of precision.

Gliding downwind feels effortless. The steady power makes your foil feel more stable, giving you the confidence to push limits further. Trying out jumps, the extra lift and height are evident, and the landings are unexpectedly smooth. On return to the beach, it's clear that the M1 marks a significant advancement in wing foiling, leaving you thrilled with the performance.

Frequently Asked Questions

What's the wind range for these wings?

WING SIZE	RIDER WEIGHT < 60kg	RIDER WEIGHT 60-80 kg	RIDER WEIGHT 80kg+
3m	>20 knots	>25 knots	>30 knots
4m	10-25 knots	15-27 knots	20-32 knots
5m	8-20 knots	10-25 knots	15-30 knots
6m	6-12 knots	10-20 knots	12-25 knots

What is this Dyneema® Material?

Developed in the Netherlands, Dyneema is the world's strongest fiber—15 times stronger than steel, yet light enough to float on water. PPC is the first to introduce this material to the foiling industry and has been integral to the performance and robustness of our wings. PPC products are made to last.

What is the warranty term?

All wings come with a 12 month warranty. All boards come with a 5 year warranty. We stand behind our products 100% in terms of physical quality, longevity and innovation. If any of our products don't meet your standards, return it and we'll issue you a full refund. It's our PPC satisfaction warranty.
